

ACA11EUZ | Targus USB 2.0 Multi-Monitor Adapter

The Targus USB 2.0 Multi-Monitor adapter will expand your view.

Connect your laptop to an external monitor via USB then choose between extending your desktop onto the secondary monitor, mirroring your laptop screen, or switching off your laptop screen and using the external monitor as your main screen

With an additional screen, you can check your emails, and work on your report at the same time without needing to switch or flip between windows.

Combined with the Targus ACP51EUZ video docking station this solution lets you support two external monitors, doubling you viewing possibilities. Have your email inbox open on one screen, your numerical spreadsheet on another and the internet open on the third - keep on top of your information requirements with one complete easy to use solution.

Convenient: Connect your laptop to an external monitor via USB

Compatible: Supports resolutions up to 2048 X 1152 including 1600 x 1200

Multi screen support -Add up to six additional monitors to your laptop, by connecting up to six adapters directly to your laptop or through a USB hub or docking station

Flexible - Choose between extending your desktop onto the secondary monitor, mirroring your laptop screen, or switching off your laptop screen and using the external monitor as your main screen

USB powered -no external power required

Productive: Combined with Targus Video docking station ACP51EUZ, expand you view over two external monitors
